Marco Sicoli 40244003

Seb Iaricci 40044952

Discussed Topics:

- Discussed platforms that we will be using for the project outlined below.
- We will be using ClientServer.
- We will be using React.js for front-end programming.
- We will be using Node.js for the back-end code.
- We will be using MongoDB to store the CRUD database entries since the database is fairly small.
- Discussed with the TA about our platform choices and next steps to take for the sprint.
- We also discussed who would work on the front-end and who would work on the back-end.
- Front end: George, Alex, Sumit
- Back end: Sunil, Marco, Seb
- Talked about the task breakdown for each team member for the sprint and next meeting.
- Roles:
 - Team Members organization: Sunil
 - Read me file and wikis: Alex and Seb
 - Project approach and technology: Alex and Marco
 - User Stories: Sumit and George
 - Plan for next sprint in Wiki: Alex and Seb
 - Task Breakdown: Sumit and George
 - Meeting Minutes: Marco

- For next meeting, each person complete their respective sprint 1 tasks.
- Coding for the project's foundation will commence next meeting.
